

# Join our AI in Drug Discovery, Development, and Commercialization Pre-Consortium

## Recruiting Now!

Collaborate with industry, academia, regulators, and patients to drive meaningful change through public-private partnerships.

Tackle challenges and explore successful AI use cases in healthcare.

Share insights, data, and resources to advance AI-driven innovation.

Lead the charge in developing and adopting trustworthy, ethical AI.

## Why Join?

AI is transforming healthcare—Over 70% of healthcare organizations are already using or pursuing AI, according to a 2024 McKinsey survey.

The National Academy of Medicine stresses the urgent need for responsible AI development to safeguard trust, privacy, and equitable healthcare.

AI is delivering results—72% of organizations realize value from AI within three months, but challenges persist, including lack of expertise, ethical concerns, and data quality, according to Enterprise Strategy.

### What We Do

Identify AI use cases across healthcare.

Develop and refine user-friendly prototypes.

Create and share synthetic data.

Partner with regulators and ensure compliance and innovation.

### Membership Benefits

Participate in 4 meetings annually with leading experts.

Engage in discussions that shape the future of AI in healthcare.

Contribute to consortium reports and initiatives.

### Membership Tiers

\$50,000:  
Revenue > \$500M

\$30,000:  
Revenue ≤ \$500M

\$5,000:  
Revenue ≤ \$5M/Nonprofits/  
Academia

No cost:  
Government agencies
